

AMENDMENTS TO THE SPECIFICATION:

On Page 1, please amend the title as follows:

~~SYSTEM FOR DELIVERING ELASTOMERIC MEDIA, USE OF THE SYSTEM AS WELL AS TWO OPERATING METHODS~~

On page 1, before paragraph 1, please add the following:

CROSS-REFERENCE TO RELATED APPLICATION

This application claims the benefit, under 35 U.S.C. §119, of the filing date of European Patent Application 0012296.3, filed on October 14, 2000.

BACKGROUND AND SUMMARY OF THE INVENTION

On page 1, please amend paragraph 1 as follows:

The present invention relates to a system for delivering elastomeric media ~~according to the preamble of Claim 1~~, to a use of the system as well as to two operating methods.

On page 3, please amend paragraph 9 as follows:

This object is achieved by means of a system for delivering elastomeric media comprising a gear pump, a screw-type extruder situated upstream of the gear pump, and a situated filter downstream of the gear pump ~~the measures indicated in the characterizing part of Claim 1~~. Advantageous further developments of the invention, a use as well as two operating methods are indicated in the additional claims.
